Saad Abs

Digital Transformation & AI

Email: hmssaad156@gmail.com **Phone:** 0645186011 **Location:** Sefrou, Morocco
LinkedIn: linkedin.com/in/saad-abs-b56221338 **DOB:** 03/04/2004

Profile

Digital Transformation and AI Engineering student with a solid background in data science, automation, and emerging technologies. Proficient in problem-solving, AI-based solutions, and optimizing business processes through digital transformation. Eager to apply technical and analytical skills in a dynamic, innovation-driven environment.

Education

Digital Transformation and Artificial Intelligence — National School of Applied Sciences (ENSAH)
09/2022 – 09/2027
Al-Hoceima, Morocco

Baccalaureate in Physical Sciences — Bir Anzarane High School
2022
Sefrou, Morocco

Skills

Programming Languages
C, Python, Java, Scala, and Assembly — across data, scripting, and application development.

Backend & Java Ecosystem
Spring Boot, Spring MVC, Java EE, Flask, Laravel — REST APIs and enterprise applications.

Web Development
HTML, CSS, JavaScript, React JS, Angular JS, PHP, and modern web development tools.

Machine Learning & Deep Learning
Classical ML algorithms and Deep Learning with neural networks, training, and optimization.

Databases
MySQL, PostgreSQL — relational design, SQL queries, data manipulation, and optimization.

Big Data
Distributed data processing, Big Data architectures, and large-scale pipelines.

Cybersecurity
Secure coding, authentication, access control, input validation, and application hardening

Operating Systems
Linux for development, system administration, and command-line operations.

Projects

Career2Life — Full-Stack + Machine Learning Platform
Application that turns a user profile into actionable life estimates: salary prediction, car affordability, and home price estimation through ML regression models, with a step-by-step "journey" landing page and OWASP-minded security.
Tech: Angular, Flask, scikit-learn

Darija OCR — Arabic & Moroccan Dialect Recognition
Complete OCR solution for recognizing Standard Arabic and Darija (Moroccan dialect) text, combining deep-learning models with image processing for accurate character recognition.
Tech: Python, Deep Learning, OCR, image processing

PFE Scheduling Platform — Spring MVC
Web application that automates final-project (PFE) defense planning. Imports an Excel file with students, professors, rooms, dates, start/end times, and breaks, then generates an optimized, conflict-free schedule.
Tech: Spring MVC, Java, MySQL, Apache POI

BudgetChef — Smart Meal Planner
Meal-planning web app that helps users build affordable, nutritious meal plans while tracking grocery expenses. Allows easy management of recipes, budgets, and meal plans through a clean front end.
Tech: Flask, MySQL, HTML, CSS, JavaScript

AS Travel — Smart Travel Application
Smart trip-planning desktop app that lets users organize travels with features like expense tracking and travel & activity suggestions.
Tech: Python, PySide

Attendance Web Application
Responsive web app for employee check-in/out, working-hours monitoring, and record management with a real-time interface.
Tech: HTML, CSS, JavaScript, MySQL

Languages

English — C1 **French** — B2 **Arabic** — Native

Interests & Soft Skills

Soft Skills: Communication • Teamwork • Adaptability • Time Management
Interests: Sports • Basketball • Travelling
